

ANDREI SHAUCHENKA

Junior / Trainee Frontend Developer

Brest, Belarus | +375 29 563-96-51 | na1x.1024@gmail.com GitHub:
github.com/Na1x-dev | LinkedIn: linkedin.com/in/symnearone/

PROFESSIONAL SUMMARY

Motivated Frontend Developer with a solid background in computer systems, specialized in building responsive, user-friendly, and performant web interfaces. Proficient in JavaScript, React, and HTML5/CSS3, with experience integrating clients with robust Java Spring Boot and Python Django backends. Fast learner with a high degree of technical adaptability, passionate about engineering pixel-perfect UIs and writing clean, scalable JavaScript/TypeScript code.

TECHNICAL SKILLS

Frontend Frameworks & Libraries: React, Redux, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design

Backend & Databases: Node.js (Core), PostgreSQL (Schema design, basic queries), Python (Django), Java

Tools & Systems: Git, GitHub, Ubuntu Linux, RESTful APIs Integration, Webpack / Vite concepts

WORK EXPERIENCE

Epol Soft — Frontend / Java Developer (*Project Internship*)

Brest, Belarus

April 2022 — May 2022

- Developed and optimized responsive UI views and web layouts for an internal web application using HTML5, CSS3, and JavaScript.
- Collaborated on building frontend components that directly interact with backend JSON APIs driven by Java Spring Boot.
- Drafted and structured relational application schemas in a PostgreSQL database ensuring data consistency for frontend client states.

Belpost — Software Engineer (*Systems & Automation*)

Brest, Belarus

August 2022 — April 2024

- Built and maintained lightweight automation scripts and internal web dashboard components using JavaScript and Python.
- Resolved critical software issues, managed client operating systems, and automated configuration tasks in an Ubuntu Linux environment.
- Performed technical troubleshooting to minimize platform downtime and streamline day-to-day corporate operations.

PROJECTS

Educational Web Platform — *Frontend Lead / Fullstack Collaborator*

- Engineered complex, responsive user interfaces and active user dashboards utilizing JavaScript and React components.
- Implemented efficient state management logic to handle dynamic frontend routing, form validations, and conditional styling updates.
- Cooperated closely with a cross-functional team of developers to define REST API specifications and guarantee smooth data synchronization.

EDUCATION

Brest State Technical University (BSTU)

Faculty of Electronic Information Systems — Degree in Computers, Systems and Networks

Graduation: 2022

LANGUAGES

English: B1 (Intermediate) | German: A2 (Elementary)
