Education

2022

Higher education: BSTU

Faculty of Electronic Information Systems: Computers, systems and networks

About me

As an experienced Fullstack Developer with a background in computer systems, I have strong skills in developing and supporting web applications. My experience includes server-side development using Java Spring Boot and database design using PostgreSQL, enabling efficient data processing. I am also proficient in Python, Django, and JavaScript, allowing me to work with both front-end and back-end development. I participated in the development of an educational platform, where I worked closely with a team of specialists. I strive for continuous growth and new challenges.
